NIH Research

- All Institutes/Centers (IC's) have extramural research programs (R01 grants and others)
- Most have intramural research programs
- There are some trans-NIH programs (bioengineering – BECON and bioinformatics – BISTIC)
- All have Web sites accessible from NIH site – www.nih.gov

Imaging Programs

- Most IC's have imaging interests – diagnostic and/or molecular levels
- National Cancer Institute
- National Institute of Biomedical Imaging and Bioengineering
- Most IC's support application of imaging modalities to therapy

NIH Extramural Research Directions

- Basic research grant mechanism – R01
- Multi-disciplinary
- Partnerships
- Design-driven or technology-driven in addition to hypothesis-driven projects
