NIBIB uses the **Mentored Quantitative Research Development Award (K25)** to provide a mentored training period for research-oriented quantitative scientists and engineers with little or no experience in medicine and the life sciences to develop relevant research skills that will allow them to conduct basic or clinical biomedical imaging or bioengineering research and to become independent investigators. The proposed training should fill a biomedical gap in the applicant's background and justify a 3 or 4 year dedicated mentored training period. It should provide the applicant a set of new skills and experiences without which s/he cannot currently lead an investigation with the proposed specific aims, even with the inclusion of appropriate collaborators. Additionally, the proposed research should address one or more of the Scientific Program Areas supported by the NIBIB.

Please fill in the information below and forward to NIBIBKAwards@mail.nih.gov, attaching your **CV** with all publications to date including those accepted for publication and already submitted and attach a 1-page description of your **Specific Aims**, so that your eligibility can be determined.

Name: **Date**: Select today's date

Institution: **Department:**

Position (**Postdoc, Assistant Professor, Research Associate, etc.**)

Brief **description of background and skills of the candidate** (Please limit to 800 characters)**:**

Brief **description of skills and experiences sought with the K25** (Please limit to 800 characters):

Proposed mentor(s): [Please fill out a row in the table below for each proposed mentor.]
