Sensors and Point of Care
NIBIB: Bioengineering COVID-19 Response

$60M for COVID-19 technologies; $500M for SARS-CoV-2 testing

- Rapid POC and home-based testing/diagnostics
- Wearable, implantable, and remote sensors/imagers for physiological monitoring
- Medical imaging technologies, Modeling, algorithms/artificial intelligence (AI) for rapid detection, diagnosis, and monitoring of lung infection; tracking and predicting disease
- Non-contact sensing and imaging for rapid mass screening and vital sign assessment
- Digital health platforms and models that integrate data, assess risk, and provide illness surveillance and management tools

### Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC)

**Postdoctoral Career Transition Award to Promote Diversity (K99/R00 - Independent Clinical Trial Not Allowed)**

The purpose of the MOSAIC Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to support a cohort of early career, independent investigators from diverse backgrounds conducting research in NIH mission areas. The long-term goal of this program is to enhance diversity in the biomedical research workforce.

**Ruth L. Kirschstein National Research Service Awards (NRSA) for Individual Postdoctoral Fellows (Parent F32)**

Supports mentored training for postdoctoral fellows obtaining additional research experience.

**NIH Pathway to Independence Award (Parent K99/R00)**

Facilitates a timely transition from postdoctoral research to an independent research position.

**BRAIN Initiative Fellows: Ruth L. Kirschstein National Research Service Award (NRSA) Individual Postdoctoral Fellowship (F32)**

Enhances the research training of promising postdoctorates, early in their postdoctoral training period, who have the potential to become productive investigators in research areas that will advance the goals of the BRAIN Initiative.

**BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00)**

Individual Fellowships (F)

Ruth L. Kirschstein, MD – National Research Service Award (NRSA)

- **F30** – Individual Predoctoral **MD/PhD** Fellowship (without MSTP), **F30 NIBIB**
- **F31** – Individual **Predoctoral** Fellowship to Promote Diversity, **F31 NIBIB** (Note: NIBIB does not participate in the Parent F31, PA-19-195)
- **F32** – Individual **Postdoctoral** Fellowship, **F32 NIBIB**
- **BRAIN F32** – BRAIN Initiative **Postdoctoral** Fellowships, **BRAIN F32**

- Must be citizen, non-citizen national, or permanent resident
- Must have identified Sponsor and defined Research Training Plan
- Individual fellow applies through their university/institution

Contact: joan.greve@nih.gov
Individual Fellowships (F) Common Elements

Common Elements

• **Applicant (PI):** High quality past experience (academic record and research), potential to be a productive researcher, committed to a research career in the future.

• **Sponsor(s):** Appropriate scientific background, experience with mentoring during given career stage of Applicant, funding support for Applicant’s research, if a team – well justified and roles clearly defined.

• **Research Training Plan:**
  • Research Project: High quality, goals and timeline appropriate for given career stage of Applicant.
  • Training: Enhances Applicant’s development into a productive researcher, well integrated with Research Project, individualized for the Applicant.

• **Institutional Environment:** Supportive of training, including facilities and resources.
Inquiry to assess: 1) fit to NIBIB mission, 2) Eligibility

- **Specific Aims**
    - Support for *novel technology development* that is generalizable to more than one disease/condition/tissue/organ, rather than the investigation of a single disease or biological system.

- **CV/Biosketch**

- **At least 1 month in advance**
Individual Fellowships (F): F30

- **F30** – Individual **Predoctoral MD/PhD** Fellowship (without MSTP), **F30 NIBIB**
  - Within 48 months of matriculation into the MD/PhD program
  - 5 years of support
  - <6 years aggregate Kirschtein NRSA support, including time on a T32
  - Mentor must have grant(s) from NIBIB (*IC specific*)
  - [https://www.nigms.nih.gov/Training/InstPredoc/Pages/PredocOverview-MSTP.aspx](https://www.nigms.nih.gov/Training/InstPredoc/Pages/PredocOverview-MSTP.aspx)

Contact: [joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Individual Fellowships (F): F31

- **F31** – Individual **Predoctoral** Fellowship to Promote Diversity, [F31 NIBIB](#)

  - 2 years of support
  - <5 years aggregate Kirschtein NRSA support, including time on a T32
  - NIBIB does not participate in the Parent F31, PA-19-195
  - Applicant is in a PhD program
  - Support is provided after qualifying exam is passed and doing full-time research.
    - Takes about 9 months for review and acceptance, so could submit prior to qualifying exam.

**Contact:** [joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Individual Fellowships (F): F32 NIBIB

- **F32** – Individual **Postdoctoral** Fellowship, [F32 NIBIB](#)
  
  - 2 years of support
  - <3 years aggregate Kirschtein NRSA support, including time on a T32
  - Must have completed PhD by time of award
    - Strong applications demonstrate established relationship with post-doc mentor; application must come from post-doc institution.
  - Priority will be given to applicants who propose to work with a different mentor than that of their doctoral research, preferably at a different institution.

**Contact:** joan.greve@nih.gov
Individual Fellowships (F): Brain F32

- **F32** – BRAIN Initiative *Postdoctoral* Fellowships, [BRAIN F32](#)

  - 3 years of support
  - <3 years aggregate Kirschtein NRSA support, including time on a T32
  - Encourages applications from individuals who have *not* yet completed their terminal doctoral degree and who expect to do so within 12 months of the application due date.
  - On the application due date, candidates may *not* have completed more than 6 months of postdoctoral training.
  - *Extended DUE date to July 8, 2020*

  - Postdoctoral Institutional Training Grant (T32)
  - Postdoctoral Individual Fellowship (F32)
  - NIH Pathway to Independence (P1) Award (K99/R00)
  - Maximizing Opportunities for Scientific and Academic Independent Careers (MOSAIC K99/R00)
  - Mentored Research Scientist Development Award (K01)
  - Mentored Clinical Scientist Development Award (K08)
  - Mentored Patient-Oriented K Award (K23)
  - Mentored Quantitative K Award (K25)
- Early
  - AREA/REAP (R15)
  - Summer Research Experiences (R25)
- Middle Senior

Diversity Supplements
- Re-entry Supplements
- Loan Repayment Programs
Individual Career Development (K) Awards

Mentored support for basic and clinical investigators who are transitioning to independence, changing their research focus, or need protected research time.

For PhD or MDs:
- **K99/R00** – Pathway to Independence Award, [K99 NIBIB](#)
- MOSAIC **K99/R00** to Promote Diversity, [K99 MOSAIC NIBIB](#)
- BRAIN **K99/R00** to Promote Diversity, [K99 BRAIN](#)

For PhDs:
- **K01** – Research Scientist Development Award, [K01 NIBIB](#)
- **K25** – Quantitative Scientist Development Award, [K25 NIBIB](#)

For MDs:
- **K08** – Clinical Scientist Development Award, [K08 NIBIB](#)
- **K23** – Patient-Oriented Development Award, [K23 NIBIB](#)

Contact: [joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Individual Career Development (K) Awards: Common Elements

Common Elements

- **Applicant (PI):** Must demonstrate the potential for highly productive independent research.
- **Research Plan:** Specific Aims should reflect a strong research plan and justify the need for a dedicated period of mentored research and career development activities.
- **Mentor(s):** Expertise to cover all areas involved in the new aspects of the research (if a team – well justified and roles clearly defined) and provide environment for highly productive independent research.
- **Career Development:** Can include course work, seminars, meetings, workshops in addition to research training.
- **Clear Integration:** Between the training goals, career development plan, and the Specific Aims.
- **Results:** At the end of the K award, the Awardee should be able to provide a timeline of how/when they will be able to achieve independent funding, e.g. a Research Project Grant (RPG) like the R01.
Individual Career Development (K) Awards: Inquiry

Inquiry to assess: 1) fit to NIBIB mission, 2) Eligibility, [3) career redirection for K01, K25]

- **Eligibility Form**
- **Specific Aims**
  - **NIBIB Mission:** Transform through engineering the understanding of disease and its prevention, detection, diagnosis, and treatment.
    - Support for novel *technology development* that is generalizable to more than one disease/condition/tissue/organ, rather than the investigation of a single disease or biological system.
- **CV/Biosketch**
- **At least 1 month in advance**
Individual Career Development (K) Awards: For PhD or MDs

For PhD or MDs:
- Up to 2 years of K99, up to 3 years of R00
- Ineligible if: PD/PI on any major NIH grant or career award
- Must be in non-independent research position

• **K99/R00** – Pathway to Independence Award, [K99 NIBIB](#)
  - <4 years of post-doc
  - There is no citizenship requirement

• **MOSAIC K99/R00 to Promote Diversity**, [K99 MOSAIC NIBIB](#)
  - <4 years of post-doc
  - Must be citizen, non-citizen national, or permanent resident

• **BRAIN K99/R00 to Promote Diversity**, [K99 BRAIN](#)
  - <5 years of post-doc
  - Must be citizen, non-citizen national, or permanent resident

Contact: joan.greve@nih.gov
Individual Career Development (K) Awards: For PhDs

For PhDs

- **K01** – Research Scientist Development Award, [K01 NIBIB](#)
  - Support to obtain experience and skills in an area different from doctoral and/or post-doctoral research focus. *(Career Redirection)*

- **K25** – *Quantitative* Scientist Development Award, [K25 NIBIB](#)
  - Support for research-oriented quantitative scientists/engineers with little or no experience in medicine and life sciences to develop skills to conduct basic or clinical biomedical imaging or bioengineering research. *(Career Redirection)*
  - <10 years from terminal degree
  - 75% effort
  - 3-4 years of support, duration must be justified *(IC specific)*
  - Ineligible if: PD/PI on K award, R01, P01, P50
    - Ok if PD/PI on R03, R21
    - Can be senior post-doc, Assistant Professor, Research Track, Instructor
  - Must be citizen, non-citizen national, or permanent resident
  - Must have identified Mentor and defined Research Plan

Salary Support: Up to $90,000 plus fringe benefits per year.
Research Support: Up to $40,000 per year.

Contact: [joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Individual Career Development (K) Awards: For MD, DDS, DVM, DO, PharmD, etc.

For MD, DDS, DVM, DO, PharmD, etc.:

- **K08** – Clinical Scientist Development Award, [K08 NIBIB](#)
- **K23** – *Patient-Oriented* Development Award, [K23 NIBIB](#)

*Requires clinical doctoral degree*
*<10 years from terminal degree (end of residency/fellowship)*
*Applicants must be clinicians with active licensure (*IC specific*)*
*Ineligible if: PD/PI on K award, R01, P01, P50*
  - Ok if PD/PI on R03, R21
  - Can be senior post-doc, Assistant Professor
*Must be citizen, non-citizen national, or permanent resident*
*Must have identified Mentor and defined Research Plan*

**Contact:** [joan.greve@nih.gov](mailto:joan.greve@nih.gov)

Salary Support: Up to $105,000 plus fringe benefits per year.
Research Support: Up to $40,000 per year.
NIBIB Offers Funding Opportunities to Support Scientists at Every Stage of Their Career (4 )
Administrative Supplements

A noncompeting award that provides additional funding to a currently funded grant to meet increased costs that are within the scope of the approved project, but that were unforeseen when the new or competing renewal application was awarded. **ADMIN SUPP**

- **Diversity in Health-Related Research:** To enhance the diversity of the research workforce by recruiting and supporting *students, postdoctorates, and eligible investigators* from diverse backgrounds, including those from groups that have been shown to be underrepresented in health-related research. Also available to *PD(s)/PI(s) of research grants who are or become disabled* and need additional support to accommodate their disability in order to continue to work on the research project. **PA-20-222**

- **Re-Entry into Biomedical and Behavioral Research Careers:** To support individuals with high potential to re-enter an active research career after an *interruption for family responsibilities or other qualifying circumstances*. At the completion of the supplement, the re-entry scientist will be in a position to apply for a career development (K) award, a research award (R), or some other form of research support. **PA-18-592**

**Contact:** [joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Administrative Supplements (cont)

- **Promote Research Continuity and Retention of NIH Mentored Career Development (K) Award Recipients and Scholars:** To ensure continuity of research among recipients of mentored career development (K) awards by providing supplemental research support to help sustain the investigator’s research during critical life events. [NOT-OD-20-054](#)

- **Continuity of Biomedical and Behavioral Research Among First-Time Recipients of NIH Research Project Grant Awards:** To enhance the retention of investigators facing critical life events who are transitioning to the first renewal of their first independent research project grant award or to a second new NIH research project grant award. [NOT-OD-20-055](#)

Contact: [joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Loan Repayment Programs

Eligibility:
• M.D., Ph.D., or equivalent. Exception: Contraception & Infertility Research LRP
• U.S. Citizen or permanent resident
• Educational debt at least 20% of applicant’s annual base income
• At least 20 hours/week on research
• Domestic nonprofit, university, or government organization; NIH grant support not required

LRP NIBIB, Contact: joan.greve@nih.gov
NIBIB Offers Funding Opportunities to Support Scientists at Every Stage of Their Career (5)
Key NIH Grant Programs: Each Serves a Purpose (when faculty)

- **R01** – Research Project Grant, [R01 NIBIB](#)
  - NIH’s most commonly used grant, highly valued by peers
  - Supports a discrete, specified, circumscribed research project
  - Based on solid preliminary data
  - Typically $250-$499k per year, 3-5 years, renewable,
  - **NOTE:** NIBIB funds R01s for only 4 years, renewable. *(IC specific)*

- **R03** – Small Grant Program, [R03 NIBIB](#)
  - Self-contained: data analysis, pilots, methods development
  - $50k per year for two years

  - Breakthroughs in development of innovative techniques, agents, methodologies, models, or their applications
  - May involve considerable risk that should be balanced by the potential high impact
  - Applicants are expected to propose novel biomedical research approaches for which there is no preliminary data to demonstrate the feasibility of the proposed project.
    - These R21 applications must **not** include preliminary data that demonstrate the feasibility of the specific aims. *Applications including preliminary data will be considered noncompliant with the FOA instructions.*
  - $275k per year, typically 2 years, **not** renewable
  - R21 is **not** a “new investigator starter grant”!

**Limited number of ICs participate in R03 and R21**
R21 NIBIB: Trailblazer

- New and Early Stage Investigator
- Enhanced R21 Exploratory/Developmental Grant
  - $400,000 in direct costs over 3 years
  - Pursue a new or emerging research program (exploratory, developmental, proof of concept, or high risk-high impact)
  - Technology design-, discovery- or hypothesis-driven
- Idea differs substantially from current thinking or practice
- Applicants are expected to propose research approaches for which there are *minimal or no preliminary data*.
  - However, if available, minimal preliminary data are allowed. *Preliminary data are defined as* material which the applicant has independently produced and *not yet published* in a peer-reviewed journal. All preliminary data should be clearly marked and *limited to one-half page*, which may include one figure.
- **R21 TRAILBLAZER NIBIB, PAR-18-207**
NIBIB Offers Funding Opportunities to Support Scientists at Every Stage of Their Career (6)
R15: Research Enhancement Award (when faculty)

Supports small-scale research projects at domestic academic institutions that are not major recipients of NIH support (no more than $6 million per year in total costs in 4 of the last 7 years).

- **AREA**: Academic Research Enhancement Award, **undergraduate-focused** institutions, [AREA NIBIB](#)
- **REAP**: Research Enhancement Award for Health Professional and Graduate Schools (REAP) **graduate** schools of arts and sciences and **health professional** schools that grant baccalaureate or advanced degrees, [REAP NIBIB](#)
  - Common Goals: 1) Support meritorious research; 2) Expose students to research; 3) Strengthen the research environment of the institution.
  - Applicants may not be the PI on any other active NIH grant.
  - Up to $300,000 direct costs + full F&A for up to 3 years.

Contact: joan.greve@nih.gov
R25: Research Education Program (when faculty)

Supports research education activities that complement and/or enhance the training of a workforce to meet the nation’s biomedical, behavioral, and clinical research needs.

- **ESTEEMED** (Enhancing Science, Technology, Engineering, and Math Educational Diversity): To support educational activities that enhance the diversity of the biomedical research workforce through early preparation for undergraduate students in bioengineering or related STEM fields. [ESTEEMED NIBIB, Contact: zeynep.erim@nih.gov](mailto:zeynep.erim@nih.gov)

- **Team-Based Design**: To establish new or to enhance existing undergraduate team-based design courses in biomedical engineering departments or programs. [Team-Based Design NIBIB, Contact: joan.greve@nih.gov](mailto:joan.greve@nih.gov)
Design Challenge (when faculty)

- **DEBUT (DEsign by Biomedical Undergraduate Teams):** Challenge undergraduate student teams to develop technology solutions to unmet needs in any area of healthcare. [DEBUT NIBIB, Contact: zeynep.erim@nih.gov]

**2020: $100,000 in Prizes**

- Application Deadline: June 1
- Winners Announced: August 25
- Awards: October 15, 2020 BMES SD

**NIBIB-Sponsored Prizes:**
- The Steven H. Krosnick Prize: $20,000
- Second Prize: $15,000
- Third Prize: $10,000
- HIV/AIDS Prize: $15,000
- NIMHD Prize for Low-Resource Settings: $15,000
- 5 Honorable Mentions: $1,000 each

**VentureWell-Sponsored Prizes:**
- Venture Prize: $15,000
- Design Excellence Prize: $5,000
Institutional Research Training Grant (when senior faculty)

Ruth L. Kirschstein, MD – National Research Service Award (NRSA)

- **T32** – To enable institutions to support pre-doctoral and post-doctoral research training for talented individuals in the fields of biomedical imaging, bioengineering and health informatics.
- Something you are doing uniquely, typically supports <10 students.

- **What you can do now** → Look in REPORTER to find T32’s (E.g. if you are headed off to a PhD or postdoc, could identify T32’s you could potentially be supported on at new institution.)

**T32 NIBIB**, Contact: zeynep.erim@nih.gov

NIBIB Small Business Programs

Overview

The National Institutes of Health (NIH) Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are congressionally-mandated set-aside programs to encourage research and development that has a strong potential for technology commercialization. These programs were developed to meet the following objectives:

- Stimulate technological innovation;
- Meet federal research and development needs;
- Increase private-sector commercialization of innovations developed through federal R&D funding; and
- Foster and encourage participation in innovation and entrepreneurship by socially and economically disadvantaged persons and women-owned small businesses.

The Small Business Program at the NIBIB is used to achieve the mission of the Institute by supporting innovative technologies through various stages of commercial research and development. The NIBIB welcomes SBIR and STTR applications from small businesses proposing ideas relevant to its scientific program areas, which can be found at http://www.nibib.nih.gov/research-funding. Please contact program staff if you have questions about which Institute(s) would be the best fit for your project.

https://www.nibib.nih.gov/research-funding/small-business-programs
Additional NIH Funding Opportunities
DP5: Early Independence Award

Supports outstanding junior scientists with the intellect, scientific creativity, drive, and maturity to bypass the traditional postdoctoral training period to launch independent research careers.

For PhD or MDs:

- Complete doctoral degree or clinical training between June 1, 2019 and September 30, 2021
- In non-independent research position at time of application
- Single PI only
- Preliminary data not required
- $250,000 direct costs per year for up to 5 years
- Minimum of 80% research effort in first 2 years
- 3-5 Letters of Reference required
- Only 2 applications allowed per institution
- RFA-RM-19-008 and RFA-RM-20-021 (COVID-19)
- DUE: September 4, 2020
- NIH Common Fund
DP2: New Innovator Award

Supports exceptionally creative early career investigators who propose innovative, high-impact projects.

**Hybrid for PhD or MDs:**
- Early Stage Investigator (no NIH R01 or equivalent grant and within 10 years of doctoral degree or clinical training)
- Single PI only
- No preliminary data required
- Awards of $1.5 million disbursed in first year of 5 year project period
- Commit 25% research effort
- [RFA-RM-19-006](#)
- **DUE: August 21, 2020**
- NIH Common Fund
1. Are all grant mechanisms offered by each IC?
2. Does each IC have the same requirements for a given grant mechanism?
3. How far in advance should you submit an inquiry to have a reasonable chance of receiving a response?
4. Who should be your closest ally when developing your proposal?

1. No
2. No
3. 1 month, need to think ahead/be prepared
4. Your advisor ... or a designated mentor for early faculty! Mentorship in grant writing is critical.
To-Do’s

This slide deck is not a substitute for ... reading, highlighting, annotating FOA’s ... for yourself! ... for your future mentees!!!

NIH
Home base!, https://grants.nih.gov/grants/oer.htm
NIBIB research funding, scroll down for Scientific Program Areas which will list Scientific Program Officers, https://www.nibib.nih.gov/research-funding
Study sections, https://public.csr.nih.gov/StudySections
Do you know about Early Stage Investigator ... and New Investigator?
https://public.csr.nih.gov/ForApplicants/PlanningAndWriting/NewInvestigatorAdvantages

Outside of NIH
Apply for internal grants at your institution (travel, research, other)
Apply for awards at your various conferences (why not?! If not you, then who?!)

Thank you!
