The mission of the National Institute of Biomedical Imaging and Bioengineering (NIBIB) is to improve human health by leading the development and accelerating the application of biomedical technologies. The Institute is committed to integrating the physical and engineering sciences with the life sciences to advance basic research and medical care.

The NIH Small Business Innovation Research (SBIR) and the Small Business Technology Transfer (STTR) programs award federal research grants and contracts to small businesses conducting biomedical research. These programs invest over $1 billion into health and life science companies that are creating innovative technologies that align with NIH’s mission to improve health and save lives. A key objective is to translate promising technologies to the private sector and enable life-saving innovations to reach consumer markets.

**Program Structure**

Both the SBIR and STTR are divided into three phases listed below. NIH offers a Fast-track Option that allows small businesses to submit one application for Phase I and Phase II; a Direct SBIR Phase II solicitation, which permits small businesses to bypass a Phase I award if they have already proved the feasibility of their technology; and a Commercial Readiness Pilot Program solicitation that can help support commercialization activities. For more information about which solicitation is best suited for your small business, please visit the NIH SBIR/STTR website (https://sbir.nih.gov/funding) and speak to the appropriate SBIR/STTR program manager (https://sbir.nih.gov/engage/ic-contacts).

NIBIB Research Areas of Interest

**Division of Applied Science & Technology (Bioimaging)**
- Bio-Electromagnetic Technologies
- Bioanalytical Sensors
- Image-Guided Interventions
- Magnetic Resonance Imaging
- Molecular Probes and Imaging Agents
- Nuclear Medicine
- Optical Imaging and Spectroscopy
- Ultrasound: Diagnostic and interventional
- X-ray, Electron, and Ion Beam

**Division of Discovery Science & Technology (Bioengineering)**
- **Prototype Design Cluster**
  - Mathematical Modeling, Simulation and Analysis
- **Prototype Demonstration Cluster**
  - Biomaterial Interfaces
  - Biorobotic Systems
  - Synthetic Biological Systems

**Division of Health Informatics**
- Artificial Intelligence, Machine Learning, and Deep Learning
- Digital Health - Mobile Health and Telehealth
- Biomedical Informatics
- Point of Care Technologies – Diagnostics
- Image Processing, Visual Perception and Display

For a more detailed description of the NIBIB scientific program areas, please visit [nibib.nih.gov/research-funding](http://nibib.nih.gov/research-funding).

**Funding Opportunities**

**NIBIB Resources for Small Businesses**

**Entrepreneurial Finance for Biomedical Innovators:**
(Video Course): This free video series provides biomedical entrepreneurs with a detailed framework for building a stepwise, validated financial plan. Move beyond the short-term perspective of immediate financing needs to a comprehensive, long-term financial plan to help you increase the probability of success for your venture!

**Technical and Business Assistance - Needs Assessment:**
The TABA Needs Assessment Report provides a third party, unbiased assessment of your program in 10 technical and business areas that are critical to success in the competitive healthcare marketplace.

**NIH Innovator Support:** The SEED Innovator Support Team is a FREE business resource for small business awardees seeking assistance with commercializing their technology and ensuring success in the market. There are no fixed time commitments or funding required - support is on an "as needed" basis to assist you in your commercialization objectives.

**C3i Program**
The C3i program is designed to provide medical device innovators with the specialized business frameworks and essential tools for successful translation of biomedical technologies from lab to market. NIH-supported researchers are eligible for this entrepreneurial training program. The curriculum and customized mentoring enhanced preparations for SBIR and STTR applications and position the companies for commercialization success. For more information, please visit the NIBIB website at [nibib.nih.gov/research-program/c3i](http://nibib.nih.gov/research-program/c3i).

**Notices of Special Interest**
